John – that is the basis of the number in the current PRG table.

Subject: TBT PRG misunderstanding

Hi Burt. I think that I caught you cold at the Portland Harbor FS meeting on March 4 with the question about units on the TBT PRG (dry weight or OC-normalized). I've gone back and checked and I believe that I misunderstood the basis for the PRG. I now believe that it is the Level 2 SQV from the LRM (presented in Table 6-11 of the Final BERA), which is 3.1 mg/kg-dw. Is that your understanding as well? John
